1：important: format your pendrive with FAT32

If with NTFS and the box can not read the pendrive/USB stick

2: openATV download web is checked from:
https://images.mynonpublic.com/openatv/index.php?v=8.0&open=zgemmah8se

You can see the openATV image separate two parts, one is recovery_usb.zip and nand.zip, now , download the USB, show the below:

After download the file " openatv-8.0.1-zgemmah8se-20261109_recovery_usb.zip" and unzip/extract the file, after that copy the all files to your pendrive/USB stick, and then insert the pendrive into the box, if the box in power on and turn it off

3: get the remote control to keep pressing the red power button or any button before you use your other hand to make the button power on,

after the box is power on, and still keep pressing the remote button, after you see box's logo light is blink, and stop pressing the remote, and the box is doing Reflash , wait for few minutes and it will done it automatically
