Format your UBS stick with FAT32, do not with NTFS

1: Download openATV from:
https://images.mynonpublic.com/openatv/current/index.php?open=zgemmah17twin

2: Download the first one with recovery_emmc.zip or the one with newest date, show below:

3: After download it, extract/unzip the zip file, copy all to the pendrive/USB stick

4: Insert the USB stick into the box's USB slot

5: Keep pressing the Reset key on rear panel, while in the meantime, use other hand to press white button to make power on

The Reset key show below:

power button show below

6: After make power on, and keep pressing re set key for 2 to 3 seconds, or until you will the display show FLSH and loose pressing, and let it flash automatically , after flashing and the new image will re star system automatically

Display FLSH show below:
